

Swan Hills Treatment Centre

Safety, Health & Environmental Mission & Core Policy

Mission Statement

SUEZ and its dedicated team of employees, operates the only fully integrated waste treatment facility in Canada. High-level Safety, Health & Environment performance is a core value in our management principals and forms the center of our guiding policies. Through the shared responsibility of all employees, our focus is on Zero incidents.

Core Policy

We will work towards Zero Lost Time Incidents, Medical Aids and Approval Contraventions by consistently working as a team on the leading indicators of incidents. In recognition of safety, health & environmental risks being inherent to our business, we commit to:

- Identify, evaluate, manage and minimize the current and long-term risks associated with our business.
- Work as one team to continually improve our safety, health and environment performance spearheaded by the Joint Worksite Safety Committee.
- Conduct operations in compliance with occupational health and safety, and environmental regulations along with any other committed to external obligations.
- Ensure our operations strive to meet a high standard in fulfilling our commitment in pollution prevention and environmental protection.
- Train all people who work for or on our behalf on our policies, procedures and systems.
- Develop measurable objectives and targets that fulfill our improvement goals in safety, health and environmental performance.
- Consult and communicate our performance with all internal and external stakeholders.
- Routinely assess our safety, health & environmental objectives, targets and programs to ensure continuous improvement.
